**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 29-31, 33 and 35 are rejected under 35 U.S.C. 102 (b) as being anticipated by Allpress et al. (Pub. No. 20050073977).

- With respect to claims 29 and 33, Allpress discloses a wireless device comprising:

a modem (e.g. carrier 102 in fig. 3) coupled to a radio frequency (RF) circuit (306 in fig. 3), the modem containing circuitry to encode and modulate a first data stream to provide to the RF circuit for data transmission purposes (e.g. 202 and 220 in fig. 2) and demodulate and decode a first received signal from the RF circuit for data reception purposes, wherein the modem implements a first version of a technical specification for the modem data transmission and reception (e.g. the Fig. 8 shows the receiver); and a coprocessor coupled to the modem and the RF circuit (e.g. block 302 and 303 in fig. 3), the coprocessor containing circuitry to encode and modulate a second data stream to provide to the RF circuit for data transmission purposes and demodulate and decode a second received signal from the RF circuit for data reception purposes, wherein the coprocessor implements a second version of the technical specification for the coprocessor data transmission and reception (e.g. fig. 4 shows the transmitter and Fig. 8 for receiver) and the RF circuit, wherein the RF circuit contains circuitry to wirelessly transmit the

first and second data stream and wirelessly receive the first and second received signals (e.g. fig. 1 shows the wireless ).

- With respect to claim 30, Allpress discloses wherein the second version of technical specification is a superset of the first version of the technical specification (e.g. the wideband and narrowband in Fig. 3 of CDMA).

- With respect to claim 31, Allpress discloses wherein the coprocessor implements a portion of the second version of the technical specification not included in the first version of the technical specification (e.g. the Wideband in Fig. 3)

- With respect to claim 35, Allpress teaches wherein the wireless communication system is a CDMA Release C compliant system (e.g. IS-95 in col. 1, line 10).

#### ***Response to Amendment***

3. Applicant's arguments with respect to claims 29-31 and 34-35 have been considered but are moot in view of the new ground(s) of rejection.

#### ***Allowable Subject Matter***

4. Claims 19-28 are allowed.

5. Claim 32, and 34 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.
